This document is based on an original document '**YHGfL Guidance for creating an eSafety Policy**' produced by the YHGfL eSafety Officer and adapted by ITCAS for Kirklees Schools in January 2010. This update (May 2013) includes new material from the YHGfL document '**Creating a Primary eSafeguarding policy**' and '**Creating a Secondary eSafeguarding Policy**' produced in 2012

Introduction

This eSafety policy recognises the commitment of our school to eSafety and acknowledges its part in the school's overall safeguarding policies and procedures. It shows our commitment to meeting the requirement to keep students safe when using technology. We believe the whole school community can benefit from the opportunities provided by the Internet and other technologies used in everyday life. The eSafety policy supports this by identifying the risks and the steps we are taking to avoid them. It shows our commitment to developing a set of safe and responsible behaviours that will enable us to reduce the risks whilst continuing to benefit from the opportunities. We wish to ensure that all members of the school community are aware that unlawful or unsafe behaviour is unacceptable and that, where necessary disciplinary or legal action will be taken. We aim to minimise the risk of misplaced or malicious allegations being made against adults who work with students.

Our expectations for responsible and appropriate conduct are formalised in our Acceptable Use Policies (AUP) which we expect all supervisors and students to follow.

As part of our commitment to eSafety we also recognise our obligation to implement a range of security measures to protect the school network and facilities from attack, compromise and inappropriate use and to protect school data and other information assets from loss or inappropriate use.

The Scope of the Policy

- This policy applies to the whole school community which includes all staff employed directly or indirectly by the school, volunteer staff, students and visitors.
- The School Principal will ensure that any relevant or new legislation that may impact upon the provision for eSafety within school will be reflected within this policy.
- The Education and Inspections Act 2006 empowers the School Principal, to such extent as is reasonable, to regulate the behaviour of students when they are off the school site and empowers supervisors to impose disciplinary penalties for inappropriate behaviour. This is pertinent to incidents of cyber bullying, or other eSafety-related incidents covered by this policy, which may take place out of school, but is linked to membership of the school.
- The Education Act 2011 gives the school the power to confiscate and search the contents of any mobile device if the School Principal believes it contains any material that could be used to bully or harass others.
- The school will clearly detail its management of incidents within this policy, associated behaviour and anti-bullying policies and will, where known, inform parents and carers of incidents of inappropriate eSafety behaviour that take place out of school.

NB: For the purposes of clarity and consistency throughout this document the person in school who is taking a lead on eSafety is called the eSafety Lead.

eSafety Policy Overview

- The person in school taking on the role of eSafety lead, and also an overview of eSafety matters is Mrs. Debbie Thomas,
- This eSafety policy was created by Mr. Steven Thomas (volunteer ICT Supervisor) and updated by Mrs. Debbie Thomas (eSafety lead).
- The policy was approved by the School Principal in June, 2014.
- Policy was reviewed by the Dewsbury Gospel Church Trustees in July 2014.

Implementation of the Policy

- The School Principal will ensure all members of school staff are aware of the contents of the school eSafety policy and the use of any new technology within school.
- All supervisors, students, occasional and external users of our school ICT equipment will sign the relevant Acceptable Use Policies.
- All amendments will be published and awareness sessions will be held for all members of the school community.
- eSafety will be taught as part of the curriculum in an age-appropriate way to all students.
- eSafety posters will be prominently displayed in the ICT Room.
- The eSafety policy will be made available to parents, carers and others via the school website.

The following local and national guidance are acknowledged and included as part of our eSafety policy:

1. Kirklees LCSB Guidance

[The Kirklees Safeguarding Children's Board Procedures and Guidance](#)

Kirklees Safeguarding procedures will be followed where an eSafety issue occurs which gives rise to any concerns related to Child Protection. In particular we acknowledge the specific guidance in:

[Section 5.1.6 Child Abuse and Information Communication Technology](#)

This section of the Kirklees Safeguarding procedures covers awareness of, and response to, issues related to child abuse and the Internet. In particular we note and will follow the advice given in the following section:

Section 7. Actions to be taken where an Employee has Concerns about a Colleague

This provides guidance on the action to be taken if an employee has either information or reason to suspect that a colleague is accessing indecent images of children.

2. Official Guidance

[Guidance for Safer Working Practices for Adults who work with Children and Young People](#) produced by DCSF in Jan 2009 and still current

This guidance provides clear advice on appropriate and safe behaviours for all adults working with children in paid or unpaid capacities, in all settings and in all contexts. We acknowledge the guidance given in the following sections and accept this as part of our policy. (See extract in Appendix A, page 24).

- **Section 12 Communication with Children and Young People**
- **Section 27 Photography and Videos**
- **Section 28 Access to inappropriate images and Internet Usage**

3. Kirklees Guidance

The following Kirklees Guidance documents are included as part of this eSafety policy:

[Kirklees Electronic Communications Guidance for School Supervisor](#)

[Kirklees Information Security Guidance for School Supervisor](#)

[Kirklees First Responders Guidance for School Supervisor](#)

The following document is included for information

[Misuse of Electronic Communications](#) – information for all Kirklees education supervisors.

Responsibilities of the School Community

We believe that eSafety is the responsibility of the whole school community and that everyone has their part to play in ensuring all members of the community are able to benefit from the opportunities that technology provides for learning and teaching. The following responsibilities demonstrate how each member of the community will contribute.

The School Principal accepts the following responsibilities:

- The School Principal will take the ultimate responsibility for the eSafety of the school community.
- Identify a person (the eSafety Lead) to take day to day responsibility for eSafety; provide them with training; monitor and support them in their work. On those days the eSafety Lead isn't working in the school, this responsibility will be assumed by the School Principal.
- Ensure adequate technical support is in place to maintain a secure ICT system.
- Ensure policies and procedures are in place to ensure the integrity of the school's information and data assets.
- Ensure that any person who is not a member of staff, who makes use of the school ICT equipment in any context, is made aware of the Acceptable Use Policy.
- Ensure that eSafety education is embedded across the curriculum.
- Develop and promote an eSafety culture within the school community.
- Ensure that all supervisors, students and other users agree to the Acceptable Use Policy and that new staff have eSafety included as part of their induction procedures.
- Make appropriate resources, training and support available to all members of the school community to ensure they are able to carry out their roles effectively with regard to eSafety.
- Receive and regularly review eSafety incident logs; ensure that the correct procedures are followed should an eSafety incident occur in school and review incidents to see if further action is required.
- Liaise with the Local Authority, the Local Safeguarding Children's Board and other relevant agencies as appropriate.
- To have an overview of how the school IT infrastructure provides safe access to the Internet and the steps the school takes to protect personal and sensitive data.
- Ensure appropriate funding and resources are available for the school to implement their eSafety strategy.

Responsibilities of the eSafety Lead:

- Promote an awareness and commitment to eSafety throughout the school.
- Be the first point of contact in school on all eSafety matters.
- Liaise with volunteer technical personnel on eSafety issues.
- Create eSafety policies and procedures.
- Develop an understanding of current eSafety issues, guidance and appropriate legislation.
- Ensure delivery of an appropriate level of training in eSafety issues.
- Ensure that eSafety is promoted to parents and carers (where applicable).
- Monitor and report on eSafety issues to the School Principal as appropriate.
- Ensure that supervisors and students know the procedure to follow should they encounter any material or communication that makes them feel uncomfortable and how to report an eSafety incident.
- Ensure that Good Practice Guides for eSafety are displayed in the ICT classroom.
- To promote the positive use of modern technologies and the Internet.

Responsibilities of the School Administrator:

- Read, understand and help promote the school's eSafety policies and guidance.
- Read, understand and adhere to the Acceptable Use Policies (AUP).
- Maintain eSafety policies and procedures.
- Ensure an eSafety incident log is kept up-to-date.
- To ensure that the school eSafety policy and AUPs are reviewed as required.
- Understand and raise awareness of the issues and risks surrounding the sharing of personal or sensitive information.
- Be aware of and understand the risks to young people from online activities such as grooming for sexual exploitation, sexting, cyber bullying and others.
- Raise awareness of the particular issues which may arise for vulnerable students in the school's approach to eSafety ensuring that supervisors know the correct child protection procedures to follow.

Responsibilities of all Supervisors:

- Read, understand and help promote the school's eSafety policies and guidance.
- Read, understand and adhere to the AUPs.
- Take responsibility for ensuring the safety of sensitive school data and information.
- Develop and maintain an awareness of current eSafety issues, legislation and guidance relevant to their work.
- Maintain a professional level of conduct in their personal use of technology at all times.
- Ensure that all digital communication with students is on a professional level and only through school based systems, **NEVER** through personal email, text, mobile phone social network or other online medium.
- Embed eSafety messages in learning activities where appropriate.
- Supervise students carefully when engaged in learning activities involving technology.
- Ensure that students are told what to do should they encounter any material or receive a communication which makes them feel uncomfortable.
- Report all eSafety incidents which occur in the appropriate log and/or to the School Principal or School Administrator.
- Respect, and share with students the feelings, rights, values and intellectual property of others in their use of technology in school and at home.

Additional Responsibilities of the Volunteer Technical Personnel:

- Support the school in providing a safe technical infrastructure to support learning and teaching.
- Ensure appropriate technical steps are in place to safeguard the security of the school ICT system, sensitive data and information. Review these regularly with the eSafety Lead to ensure they are up to date.
- Ensure that provision exists for misuse detection and malicious attack.
- At the request of the School Principal conduct occasional checks on files, folders, email and other digital content to ensure that the Acceptable Use Policy is being followed.
- Report any eSafety-related issues that come to their attention to the eSafety Lead, the School Principal.

- Ensure that procedures are in place for new starters and leavers to be correctly added to and removed from all relevant electronic systems, including password management.
- Ensure that suitable access arrangements are in place for any external users of the schools ICT equipment.
- Liaise with the Local Authority and others on eSafety issues.
- Document all technical procedures and review them for accuracy at appropriate intervals.
- Ensure appropriate backup procedures exist so that critical information and systems can be recovered in the event of a disaster.

Responsibilities of Students:

- Read, understand and adhere to the AUP and follow all safe practice guidance.
- Take responsibility for their own and each other's' safe and responsible use of technology wherever it is being used, including judging the risks posed by the personal technology owned and used by them outside of school.
- Ensure they respect the feelings, rights, values and intellectual property of others in their use of technology in school and at home.
- Understand what action should be taken if they feel worried, uncomfortable, vulnerable or at risk whilst using technology, or if they know of someone to whom this is happening.
- Discuss eSafety issues with family and friends in an open and honest way.
- Report all eSafety incidents to appropriate members of staff.
- To know, understand and follow school policies on the use of mobile phones, digital cameras and handheld devices.
- To know, understand and follow school policies regarding cyber bullying.

Responsibilities of Parents and Carers:

- Help and support the school in promoting eSafety.
- Read, understand and promote the AUP with their children.
- Discuss eSafety concerns with their children, show an interest in how they are using technology, and encourage them to behave safely and responsibly when using technology.
- Consult with the school if they have any concerns about their child's use of technology.

- To agree to and sign the home-school agreement which clearly sets out the use of photographic and video images of students.
- To agree to and sign the home-school agreement containing a statement regarding their personal use of social networks in relation the school: *We will support the school approach to online safety and not deliberately post comments or upload any images, sounds or text that could upset or offend any member of the school community or bring the school into disrepute.*

Acceptable Use Policies

School has a number of AUP for different groups of users.

These are shared with all users yearly and supervisors and students will be expected to agree to them and follow their guidelines. We will ensure that visitors to school who use our ICT facilities are made aware of the appropriate AUP.

School Acceptable Use Policy documents

AUP - Staff/Volunteers

AUP - Junior Students

AUP - Senior Students

Learning and Teaching

We believe that the key to developing safe and responsible behaviours online for everyone within our school community lies in effective education. We know that the Internet and other technologies are embedded in our students' lives, not just in school but outside as well, and we believe we have a duty to help prepare our students to benefit safely from the opportunities that these present.

We will deliver a planned and progressive scheme of work to teach eSafety knowledge and understanding and to ensure that students have a growing understanding of how to manage the risks involved in online activity. We believe that learning about eSafety should be embedded across the curriculum and also taught in specific lessons such as in ICT and PSICHE.

We will teach students how to search for information and to evaluate the content of websites for accuracy when using them in any curriculum area. Supervisor and students will be reminded that third party content should always be appropriately attributed so as not to breach copyright laws.

We will discuss, remind or raise relevant eSafety messages with students routinely wherever suitable opportunities arise. This includes the need to protect personal information and to consider the consequences their actions may have on others. Supervisor will model safe and responsible behaviour in their own use of technology during lessons.

We will remind students about the responsibilities to which they have agreed through the AUP.

Students will be made aware of where to seek advice or help if they experience problems when using the internet and related technologies.

How parents and carers will be involved

We believe it is important to help all our students parents develop sufficient knowledge, skills and understanding to be able to help keep themselves and their children safe.

To achieve this we will offer opportunities for finding out more information through parent meetings, the school newsletter and website.

We will ask all parents to discuss the student's AUP with their child and return a signed copy to the school. We also ask parents to sign the Home school agreement which includes a statement about their use of social networks in situations where it could reflect on our school's reputation and on individuals within the school community.

We request our parents to support the school in applying the eSafety policy.

Managing and Safeguarding IT systems

The school will ensure that access to the school IT system is as safe and secure as reasonably possible.

The main IT server and other key hardware or infrastructure is managed securely with only appropriate supervisor permitted access. The server, workstations and other hardware and software are kept updated as appropriate. A firewall is maintained and virus and malware protection is installed on all appropriate hardware and is kept active and up-to-date. Supervisors have virus protection installed on all laptops used for school activity.

All administrator or master passwords for school IT systems are kept secure and available to at least two members of staff, including the Volunteer ICT Supervisor, the School Administrator, and members of the Volunteer Technical Personnel.

The wireless network is protected by a secure log on which prevents unauthorised access. New users can only be given access by named individuals e.g.: the Volunteer ICT Supervisor or the School Administrator.

We do not allow anyone except technical staff to download and install software onto the network. Supervisors are allowed administrator rights to download software on school provided laptops.

Filtering Internet Access

Web filtering of internet content is managed through www.opendns.com. This ensures that all reasonable precautions are taken to prevent access to illegal content. However it is not possible to guarantee that access to unsuitable or inappropriate material will never occur and we believe it is important to build resilience in students in monitoring their own internet activity.

All users are informed about the action they should take if inappropriate material is accessed or discovered on a computer. However deliberate access of inappropriate or illegal material will be treated as a serious breach of the AUP and appropriate sanctions taken.

Supervisors are encouraged to check out websites they wish to use prior to lessons for the suitability of content.

Access to School Systems

The school decides which users should and should not have Internet access, the appropriate level of access and the level of supervision they should receive. There are robust systems in place for managing network accounts and passwords, including safeguarding administrator passwords. Suitable arrangements are in place for visitors to the school who may be granted a temporary log in.

All users are provided with a log in account. Students are taught about safe practice in the use of their log in and passwords.

Supervisors are given appropriate guidance on managing access to laptops which are used both at home and school and in creating secure passwords.

Access to personal, private or sensitive information and data is restricted to authorised users only, with proper procedures being followed for authorising and protecting login and password information.

Remote access to school systems is covered by specific agreements and is never allowed to unauthorised third party users.

Detailed guidance on the protection of sensitive school data and information assets is included in the Kirklees Information Security Guidance which forms part of this policy.

Passwords

- We ensure that a secure and robust username and password convention exists for system access.
- We provide all supervisors with a unique, individually-named user account and password for access to the information system available within school.
- All students have a unique, individually-named user account and password for access to IT equipment available within school.
- All supervisors and students have responsibility for the security of their usernames and passwords and are informed that they must not allow other users to access the system using their log on details. They must immediately report any suspicion or evidence that there has been a breach of security.
- The school maintains a log of all accesses by users and of their activities while using the system in order to track any eSafety incidents.

Using the Internet

We provide the internet to:

- Support curriculum development in all subjects.
- Support the professional work of supervisors as an essential professional tool.
- Enhance the school's management information and business administration systems.
- Enable electronic communication and the exchange of curriculum and administration data with the LA, the examination boards and others.

Users are made aware that they must take responsibility for their use of, and their behaviour whilst using the school IT system or a school provided device, and that such activity can be monitored and checked.

All users of the school IT or electronic equipment will abide by the relevant Acceptable Use Policy at all times, whether working in a supervised activity or working independently.

Supervisors and students are informed about the actions to take if inappropriate material is discovered and this is supported by notices in classrooms and around school.

Using Email

Email is regarded as an essential means of communication and the school provides all members of the school community with an e-mail account for school based communication. Communication by email between supervisor, students and parents will only be made using the school email account and should be professional and related to school matters only. E-mail messages on school business should be regarded as having been sent on headed notepaper and reflect a suitable tone and content and should ensure that the good name of the school is maintained. There are systems in place for storing relevant electronic communications which take place between school and parents.

Use of the school e-mail system is monitored and checked.

It is the personal responsibility of the email account holder to keep their password secure.

As part of the curriculum, students are taught about safe and appropriate use of email

School will set clear guidelines about when student-supervisor communication via email is acceptable and supervisors will set clear boundaries for students on the out-of-school times when emails may be answered.

Under no circumstances will supervisors contact students, parents or conduct any school business using a personal email addresses.

Responsible use of personal web mail accounts on school systems is permitted outside teaching hours.

Publishing content online

E.g.: using the school website, Learning Platform, blogs, wikis, podcasts, social network sites

School website

The school maintains editorial responsibility for the school initiated web site, and publishing the relevant content online. The school ensures that the content is accurate and the quality of presentation is maintained, and also maintains the integrity of the school web site by ensuring that responsibility for uploading material is always moderated and that passwords are protected.

The point of contact on the web site is the school address, e-mail and telephone number.

Identities of students are protected at all times. Photographs of identifiable individual students are not published on the web site unless prior permission has been obtained from parents for the use of students' photographs. Group photographs do not have a name list attached.

Online material published outside the school

Supervisors and students are encouraged to adopt similar safe and responsible behaviours in their personal use of blogs, wikis, social networking sites and other online publishing outside school as they are in school.

Material published by students and supervisors in a social context which is considered to bring the school into disrepute or considered harmful to, or harassment of another student or member of the school community will be considered a breach of school discipline and treated accordingly.

Using images, video and sound

We recognise that many aspects of the curriculum can be enhanced by the use of multi-media and that there are now a wide and growing range of devices on which this can be accomplished. Students are taught safe and responsible behaviour when creating, using and storing digital images, video and sound.

Digital images, video and sound recordings are only taken with the permission of participants and their parents; images and video are of appropriate activities and are only taken of students wearing appropriate dress. Full names of participants are not used either within the resource itself, within the file-name or in accompanying text online.

We ask all parents/carers to sign an agreement about taking and publishing photographs and video of their children (in publications and on websites) and this list is checked whenever an activity is being photographed or filmed.

We secure additional parental consent specifically for the publication of students' photographs in newspapers, which ensures that parents know they have given their consent for their child to be named in the newspaper and possibly on the website.

For their own protection supervisors or other visitors to school never use a personal device (mobile phone, digital camera or digital video recorder) to take photographs of students.

We are happy for parents to take photographs at school events but will always make them aware that they are for personal use only and if they have taken photographs of children other than their own they should not be uploaded to social media sites.

Using video conferencing, web cameras and other online meetings

We use video conferencing to enhance the curriculum by providing learning and teaching activities that allow students to link up with people in other locations and see and hear each other. We ensure that supervisors and students take part in these opportunities in a safe and responsible manner. All video conferencing activity is supervised by a suitable member of staff. Students do not operate video conferencing equipment, answer calls or set up meetings without permission from the supervising member of staff.

Video conferencing equipment is switched off when not in use.

All participants are made aware if a video conference is to be recorded. Permission is sought if the material is to be published.

For their own protection a video conference or other online meeting between a member of staff and student(s) which takes place outside school or whilst the member of staff is alone is always conducted with the prior knowledge of the School Principal and respective parents and carers.

Using mobile phones

Student's mobile phones should be switched off and locked away in their individual lockers during the school day. The school will not be held responsible for loss or damage to a student's mobile phone, should they choose to bring it to school.

During lesson time we expect all mobile phones belonging to staff to be switched off unless there is a specific agreement for this not to be the case.

Where required for safety reasons in off-site activities, a supervisor's personal mobile phone can be used for contact with the school. Supervisors will never use personal mobile phones in any situation where their mobile phone number or other personal details may be revealed to a student or parent. In an emergency, where a supervisor member needs to contact a parent or student, they should use their own device and hide (by inputting 141) their own mobile number for confidentiality purposes.)

Unauthorised or secret use of a mobile phone or other electronic device, to record voice, pictures or video is forbidden. Publishing of such material on a web site which causes distress to the person(s) concerned will be considered a breach of school discipline, whether intentional or unintentional. The person responsible for the material will be expected to remove this immediately upon request. If

the victim is another student or staff member we do not consider it a defence that the activity took place outside school hours.

The sending or forwarding of text messages, emails or other online communication deliberately targeting a person with the intention of causing them distress, 'cyber bullying', will be considered a disciplinary matter.

We make it clear to supervisors, students and parents that the School Principal has the right to examine content on a mobile phone or other personal device to establish if a breach of discipline has occurred.

Using mobile devices

We recognise that the multimedia and communication facilities provided by mobile devices: (e.g. iPad, iPod, tablet, netbook, Smart phones) can provide beneficial opportunities for students. However their use in lesson time will only be with permission from the supervisor and within clearly defined boundaries.

Students are taught to use them responsibly.

Using other technology

As a school we will, where applicable, keep abreast of new technologies and evaluate both the benefits for learning and teaching and also the risks from an eSafety point of view.

We will regularly review the eSafety policy to reflect any new technology that we use, or to reflect the use of new technology by students.

Supervisors or students using a technology not specifically mentioned in this policy, or a personal device, whether connected to the school network or not, will be expected to adhere to similar standards of behaviour to those outlined in this document.

Protecting school data and information

The school recognises their obligation to safeguard supervisors and students sensitive and personal data including that which is stored and transmitted electronically. We regularly review our practices and procedures to ensure that they meet this basic obligation.

The school is a registered Data Controller under the Data Protection Act 1998 and we comply at all times with the requirements of that registration. All access to personal or sensitive information owned by the school will be controlled appropriately through technical and non-technical access controls.

Students are taught about the need to protect their own personal data as part of their eSafety awareness and the risks resulting from giving this away to third parties.

Suitable procedures, and where necessary training, are in place to ensure the security of such data including the following:

- If required, supervisors can request an encrypted USB memory sticks for carrying sensitive data.
- All computers or laptops holding sensitive information are set up with strong passwords, password protected screen savers and screens are locked when they are left unattended.
- Supervisors are provided with appropriate levels of access to the school information system holding student data. Passwords are not shared and administrator passwords are kept securely.
- Supervisors are aware of their obligation to keep sensitive data secure when working on computers outside school.
- All devices taken off site, e.g.: laptops should be secured to protect sensitive and personal data and not left in cars or insecure locations.
- When we dispose of old computers and other equipment we take due regard for destroying information which may be held on them.
- Remote access to computers is by authorised personnel only.
- We have full back up and recovery procedures in place for school data.
- Where sensitive supervisor or student data is shared with other people who have a right to see the information, we label the material appropriately to remind them of their duty to keep it secure and securely destroy any spare copies.

Management of assets

Details of all school-owned hardware and software are recorded in an inventory.

All redundant IT equipment is disposed of thoughtfully, and conforms to [The Waste Electrical and Electronic Equipment Regulations 2006](#) and/or [The Waste Electrical and Electronic Equipment \(Amendment\) Regulations 2007](#). [Further information](#) can be found on the Environment Agency website.

Dealing with eSafety incidents

All eSafety incidents are recorded in the School eSafety Log which is regularly reviewed.

Any incidents where students do not follow the Acceptable Use Policy will be dealt with following the school's normal behaviour or disciplinary procedures.

In situations where a member of staff is made aware of a serious eSafety incident, concerning students or supervisors, they will inform the eSafety Lead, the School Administrator or the School Principal who will then respond in the most appropriate manner.

Instances of cyber bullying will be taken very seriously by the school and dealt with using the schools anti-bullying procedures. School recognises that supervisors as well as students may be victims and will take appropriate action in either situation, including instigating restorative practices to support the victim.

Incidents which create a risk to the security of the school network, or create an information security risk, will be referred to the school's eSafety Lead and/or the Volunteer Technical Personnel, and appropriate advice sought and action taken to minimise the risk and prevent further instances occurring, including reviewing any policies, procedures or guidance. If the action breaches school policy then appropriate sanctions will be applied. The school will decide if parents need to be informed if there is a risk that student data has been lost.

The school reserves the right to monitor equipment on their premises and to search any technology equipment, including personal equipment with permission, when a breach of this policy is suspected.

Dealing with a Child Protection issue arising from the use of technology

If an incident occurs which raises concerns about Child Protection or the discovery of indecent images on the computer, then the procedures outlined in the Kirklees Safeguarding Procedures and Guidance will be followed.

[Section 5.1.6 Child Abuse and Information Communication Technology](#)

Dealing with complaints and breaches of conduct by students:

- Any complaints or breaches of conduct will be dealt with promptly.
- The School Principal has the main responsibility for handling serious incidents.
- Parents and the student will work in partnership with staff to resolve any issues arising.
- There may be occasions when the police must be contacted. Early contact will be made to establish the legal position and discuss strategies.

The following activities constitute behaviour which we would always consider unacceptable (and possibly illegal):

- Accessing inappropriate or illegal content deliberately.
- Deliberately accessing downloading and disseminating any material deemed offensive, obscene, defamatory, racist, homophobic or violent.
- Continuing to send or post material regarded as harassment or of a bullying nature after being warned.
- Supervisors using digital communications to communicate with students in an inappropriate manner (for instance, using personal email accounts, personal mobile phones, or inappropriate communication via social networking sites).

The following activities are likely to result in disciplinary action:

- Any online activity by a member of the school community which is likely to adversely impact on the reputation of the school.
- Accessing inappropriate or illegal content accidentally and failing to report this.
- Inappropriate use of personal technologies (e.g.: mobile phones) at school or in lessons.
- Sharing files which are not legitimately obtained - e.g.: music files from a file sharing site.
- Using school or personal equipment to send a message, or create content, that is offensive or bullying in nature or could bring the school into disrepute.
- Attempting to circumvent school filtering, monitoring or other security systems.
- Circulation of commercial, advertising or 'chain' emails or messages.
- Revealing the personal information (including digital images, videos and text) of others by electronic means (e.g.: sending of messages, creating online content) without permission.
- Using online content in such a way as to infringe copyright or which fails to acknowledge ownership (including plagiarizing of online content).
- Transferring sensitive data insecurely or infringing the conditions of the Data protection Act, revised 1988.

The following activities would normally be unacceptable; in some circumstances they may be allowed e.g.: as part of planned curriculum activity or by a system administrator to problem solve

- Accessing social networking sites, chat sites, instant messaging accounts, email or using a mobile phone for personal use during lesson time.
- Accessing non-educational websites (e.g. gaming or shopping websites) during lesson time.
- Sharing a username and password with others or allowing another person to log in using your account.
- Accessing school ICT system with someone else's username and password.
- Deliberately opening, altering, deleting or otherwise accessing files or data belonging to someone else.

Appendix A

Extract from: **Guidance for Safer Working Practice for Adults who work with Children and Young People. DCSF January 2009 (still current)**

Section 12 Communication with Children and Young People (*including the Use of Technology*)

Communication between children and adults, by whatever method, should take place within clear and explicit professional boundaries. This includes the wider use of technology such as mobile phones text messaging, e-mails, digital cameras, videos, web-cams, websites and blogs. Adults should not share any personal information with a child or young person. They should not request, or respond to, any personal information from the child/young person, other than that which might be appropriate as part of their professional role. Adults should ensure that all communications are transparent and open to scrutiny.

Adults should also be circumspect in their communications with children so as to avoid any possible misinterpretation of their motives or any behaviour which could be construed as grooming. They should not give their personal contact details to children and young people including e-mail, home or mobile telephone numbers, unless the need to do so is agreed with senior management and parents/carers. E-mail or text communications between an adult and a child young person outside agreed protocols may lead to disciplinary and/or criminal investigations. This also includes communications through internet based web sites.

Internal e-mail systems should only be used in accordance with the organization's policy.

This means that the organization should:

- *have a communication policy which specifies acceptable and permissible modes of communication*

This means that adults should:

- *not give their personal contact details to children or young people, including their mobile telephone number and details of any blogs or personal websites*
- *only use equipment e.g. mobile phones, provided by organization to communicate with children, making sure that parents have given permission for this form of communication to be used*
- *only make contact with children for professional reasons and in accordance with any organization policy*
- *recognize that text messaging is rarely an appropriate response to a child in a crisis situation or at risk of harm. It should only be used as a last resort when other forms of communication are not possible*
- *not use internet or web-based communication channels to send personal messages to a child/young person*
- *ensure that if a social networking site is used, details are not shared with children and young people and privacy settings are set at maximum*

Section 27 Photography and Videos

Working with children and young people may involve the taking or recording of images. Any such work should take place with due regard to the law and the need to safeguard the privacy, dignity, safety and well being of children and young people. Informed written consent from parents or carers and agreement, where possible, from the child or young person, should always be sought before an image is taken for any purpose.

Careful consideration should be given as to how activities involving the taking of images are organized and undertaken. Care should be taken to ensure that all parties understand the implications of the image being taken especially if it is to be used for any publicity purposes or published in the media, or on the Internet. There also needs to be an agreement as to whether the images will be destroyed or retained for further use, where these will be stored and who will have access to them.

Adults need to remain sensitive to any children who appear uncomfortable, for whatever reason, and should recognize the potential for such activities to raise concerns or lead to misunderstandings.

It is not appropriate for adults to take photographs of children for their personal use.

This means that adults should:

- be clear about the purpose of the activity and about what will happen to the images when the activity is concluded
- be able to justify images of children in their possession
- avoid making images in one to one situations or which show a single child with no surrounding context
- ensure the child/young person understands why the images are being taken and has agreed to the activity and that they are appropriately dressed.
- only use equipment provided or authorized by the organization
- report any concerns about any inappropriate or intrusive photographs found
- always ensure they have parental permission to take and/or display photographs

This means that adults should not:

- display or distribute images of children unless they have consent to do so from parents/carers
- use images which may cause distress
- use mobile telephones to take images of children
- take images 'in secret', or taking images in situations that may be construed as being secretive.

Section 28 Access to Inappropriate Images and Internet Usage

There are no circumstances that will justify adults possessing indecent images of children. Adults who access and possess links to such websites will be viewed as a significant and potential threat to children. Accessing, making and storing indecent images of children on the internet is illegal. This will lead to criminal investigation and the individual being barred from working with children and young people, if proven.

Adults should not use equipment belonging to their organization to access adult pornography; neither should personal equipment containing these images or links to them be brought into the workplace. This will raise serious concerns about the suitability of the adult to continue to work with children.

Adults should ensure that children and young people are not exposed to any inappropriate images or web links. Organizations and adults need to ensure that internet equipment used by children have the appropriate controls with regards to access, e.g. personal passwords should be kept confidential.

Where indecent images of children or other unsuitable material are found, the police and Local Authority Designated Officer (LADO) should be immediately informed. Adults should not attempt to investigate the matter or evaluate the material themselves, as this may lead to evidence being contaminated which in itself can lead to a criminal prosecution.
